- Call screening
- Answerphone remote access

Memory Capacity
- Name & number shared phonebook: 65
- Melody download capacity: 3
- SMS storage capacity: 25
- Call log entries: 40

Product highlights

Ringtone download
This function offers the possibility to personalize your phone by downloading ringtones. Simply call the dedicated service provider and select your favourite song. An SMS is sent to you, together with the attached melody. You can select this melody as any other ringtones (country and network dependent).

Eatoni text editor
Eatoni's LetterWise is an easy-to-use text-entry solution requiring just 1.16 taps per correct letter. It makes typing on phone keypads as comfortable, fast, and accurate as using a typewriter keyboard. It is unique among predictive text entry solutions in its ability to easily handle the entry of abbreviations, names, addresses, and URLs.

Downloadable outgoing messages
This function gives the user the possibility to download specific outgoing messages for their answering machine. Simply call the dedicated service provider and select your favourite outgoing message. This message will be recorded on the answering machine by the service provider (country and network dependent).

Full graphic display
This type of displays makes it easier to use your phone, thanks to the good quality and legibility of the characters. It also gives you more freedom in communication from your home. Now you can combine text with images or numbers, when sending an SMS for example.

Backlight on screen
Backlighting is a feature that illuminates the LCD screen or keypad for use in the dark. The two most common types of backlighting include LED and electroluminescent (EL). Remotes backlit with LEDs are typically bright but uneven with a yellow or green color, while EL panels are smooth with blue, white or green shades.

Polyphonic ringtones
A polyphonic ringtone means that the phone can play many tones simultaneously, so that an accurate musical performance is possible, and when played through the phone's speaker these polyphonic ringtones sound like real music.

Base and handset TAM control
Just look at the base station to know instanttly whether you received messages. Listening or deleting messages then become as simple as pressing one key on the base station - for those who never remember where they left their handset.

Alarm clock

Keypad lock
How convenient it is to take your DECT phone with you whilst gardening. But in your pocket it can be so jolted that a key might be accidently pressed. To prevent inadvertently calling your cousin in the US, the keypad lock is a safe way to avoid bad surprises on your next phone bill!

Pilot key & carousel menu
The pilot key navigation system allows easy navigation and settings. The pilot key is a roller on the left side of the phone that can be scrolled up and down and pressed in the middle. It commands the Carousel menu which is a circular loop of menu icons displayed on the screen.
